Meet Avlite Systems' Representatives at Canadian Airports National Electrical Workshop (CANEW)

From Monday 29th September to Friday 3rd October, Avlite Systems will be exhibiting their innovative range of solar aviation lighting products at the Canadian Airports National Electrical Workshop (CANEW), Toronto, Canada.

Hosted by The Greater Toronto Airports Authority, and sponsored by the Canadian Airports Electrical Association, CANEW 2008 provides a great opportunity for leading aviation companies to showcase the latest range of aviation innovations to delegates and industry members.

Latest products, from the ICAO approved AV70 taxiway light, AVC420 solar runway edge light, and range of Type A obstruction lights will be on display, along with one of Avlite's recent innovations, the radio-controlled solar-powered airfield lighting system.

To arrange a meeting or product demonstration with Avlite representatives during the show, please contact Mr. PJ Dillon at pj.dillon@avlite.com or cell phone +1 336-351-3519.

CANEW 2008
Holiday Inn Toronto Yorkdale
3450 Dufferin Street, Toronto, Ontario, Canada
29th September – 3rd October

ICAO Approved AV70 Taxiway Light

The smallest solar aviation light available with internal radio module. Ask Avlite representatives about this product today.
