

Avlite Systems' Parent Company Wins Prestigious International Duke's Choice Award for "Java Technology for the Environment"

NEWS RELEASE
Avlite Systems
9 July 2009

Avlite Systems' parent company, Sealite Pty Ltd, is the world's fastest growing manufacturer of marine aids to navigation. In-house research and development has enabled the company's team of leading engineers to invent a range of state-of-the-art LED lighting products which have greatly improved safety of personnel within the aviation and marine sectors worldwide.

Sealite's commitment to innovative and environmentally aware products has recently rewarded them with the prestigious 2009 Duke's Choice Award in the category of "Java Technology and the Environment" for the GSM Cell-Phone Monitoring & Alarm System.

Each year the world's biggest Java technology event, the JavaOne Conference, culminates with the Duke's Choice Awards.

Winners of the Duke's Choice Award are selected by the 'father of Java', James Gosling, Vice President of Sun Microsystems, and a panel of Java technology experts at Sun. The awards celebrate extreme innovation in the world of Java technology, and are granted to the best and most innovative projects using the Java platform.

"The primary judging criteria for this prestigious award is innovation putting small developer shops on an equal footing with multi-national giants"

- Sun Microsystems

The company's cutting-edge, environmentally-friendly, GSM Monitoring & Alarm System technology beat thousands of entries submitted by developers and companies from around the world.

Utilization of the power of Java technology has allowed Sealite to develop their GSM Cell-Phone Monitoring and Alarm System to efficiently monitor the status of marine navigation lanterns from anywhere around the world.

The advanced GSM system is internally integrated into a range of lanterns with no external aerials or base station required. Each lantern is fitted with its own SIM card, which provides a designated cell-phone contact number for each GSM enabled lantern, allowing users to interrogate and receive auto reply SMS and/or secure web portal lantern diagnostics.

Members of Sealite's GSM team proudly display the Duke's Choice Award
