## Avlite Signs Teaming Agreement with ARC

**Avlite is pleased to announce the signing of an international teaming agreement with Aviation Renewables Corporation (ARC) to strengthen worldwide sales and distribution of its leading products.**

ARC provides renewable technology and consulting solutions to the international defence and civil aviation industry.

ARC's founder and Director, Mr Allister Wilmott, is recognized for the introduction of solar LED airfield and obstruction lighting solutions to the international aviation industry. ARC is a member of IESALC GA lighting committee and released the first industry GA lighting handbook for US Airports. They have also worked with ICAO visual aids working group helping to introduce solar technology.

ARC have a team of six internationally recognised aviation advisors who consult and work with senior US DOD Commands, MAJCOMs, Pentagon, national governments, civil aviation authorities and international industry stakeholders such as FAA, ICAO, IESALC and NATO.

***"ARC is excited and motivated to support Avlite Systems Inc in its drive to be the leading solar LED aviation lighting manufacturer in the international aviation industry."***

- Allister Wilmott, Director, ARC
