Update to Avlite's Lighting Range

Avlite has updated some of the airfield and obstruction lights, which are being transitioned from aluminium to composite moulded tops and bases. The updated lights will be lighter, more environmentally friendly and have the additional benefit of latest generation solar panels with improved solar charge efficiency.

The upgraded lights include the AV-C310, AV-C410, AV-C415 and the AV-426 models.

Avlite's range are designed specifically to withstand the harshest of environments, provide years of reliable service and are a low maintenance solution for your next aviation project.
