Avlite Receives DGAC Certification to Sell Obstruction Lights into Mexico

Tilton, New Hampshire, USA – 9 November 2016 — Avlite Systems, a leading manufacturer of LED lighting for the airfield, heliport and obstruction markets, has received certification from Mexico’s governing authority to sell obstruction lights in Mexico.

Mexico’s governing body for the regulation of civil aviation safety, infrastructure and technical development, the Dirección General de Aeronáutica Civil (DGAC), granted certification to Avlite for the company’s low and medium intensity obstruction lights to be sold throughout the country. The certification will cover Avlite’s L-810 Low Intensity Obstruction Light, as well as the L-864 Medium Intensity Obstruction Light. The certification was granted after extensive product review and testing by an independent organization.

The certification opens up new doors for Avlite in the North American market, according to Tara Stewart, President of the Americas. ***“After rigorous third-party testing, it is with great pride that Avlite has received this certification. The DGAC has acknowledged Avlite as a leading and responsible manufacturer of obstruction lighting for Mexico, and we look forward to generating new business throughout Mexico’s obstruction market.”***

~MORE~

Offering unmatched flexibility and reliability, Avlite System's specializes in turn-key solar airfield & obstruction lighting solutions around the world in the harshest of environments. With the DGAC certification, Avlite has strengthened their position in providing cost effective solar obstruction lighting with leading edge GSM asset monitoring.

Avlite's AC and DC-Solar powered LED obstruction lights offer FAA and ICAO certified energy efficient lighting solutions for a variety of obstruction applications, including communication towers, smoke stacks, wind turbines, and other obstacles that might impact safe air navigation.
